REVERSE-IT's Guidelines to CYP3A Inhibitors

Generic and trade names of medications deemed strong or moderate CYP3A Inhibitors have been included below for ease of reference. The bentracimab dose will be adjusted for patients with known concomitant use of a moderate or strong CYP3A inhibitor (see protocol and pharmacy manual). All medications being taken at baseline should be evaluated to determine if they fall into this group by reviewing the following website:

[#table3-2](https://www.fda.gov/drugs/drug-interactions-labeling/drug-development-and-drug-interactions-table-substrates-inhibitors-and-inducers)

This list is not all-inclusive. Please refer to the FDA website above as an official guide.
